

MERN STACK DEVELOPMENT

OOP – Task 7

3. Write a “person” class to hold all the details.

code

//Creating Class called "Person"

```
class Person {  
  //Assigning personal details for parent constructor  
  constructor(name, age, address, qualification){  
    this.name = name;  
    this.age = age;  
    this.address = address;  
    this.qualification = qualification;  
  }  
}  
  
class Details extends Person {  
  constructor(name, age, address, qualification, designation, company, exp){  
    super(name, age, address, qualification);  
    this.designation = designation;  
    this.company = company;  
    this.exp = exp;  
  }  
}  
  
let info = new Details("Dinesh", "26", "Tamilnadu", "HSC", "Sales Rep", "Vedish Mobiles", "4 Years");  
console.log(info);
```

Output
